Received Diploma in
computer Application
(DCA) with Distinction
in June 2019

- **Badminton**

Inter-collegiate
championship
Participant

- **YOGA**

Inter-collegiate
championship second
Runner-up

PROJECTS

- **Bat - deterrent**

Designed and developed a bat deterrent system using Arduino Uno, where one ultrasonic sensor simulates a bat, and another acts as a deterrent device by transmitting a higher-frequency signal. The system triggers a buzzer that mimics a stronger ultrasonic pulse, causing the bat to move away. This method provides a non-lethal and eco-friendly solution for farmers to protect crops from bat disturbances.

- **SMART TRAFFIC MANAGEMENT SYSTEM**

Hardware that uses smart technologies to maintain traffic and improves the effectiveness of traffic.

ACHIEVEMENTS

- Inter-collegiate championship second Runner-up in **YOGA**
- Inter-collegiate championship Participant in **Badminton**
